Petra by Progen: Workflow Automation for Leasing Processes

Whether a lessee, landlord or both often leasing processes can be ad hoc, lack visibly and encounter unnecessary delays. The solution is to automate your leasing processes through Progen's New Workflow Automation Tool - PETRA.

Introduction to Petra:

- Achieve best practice within your organisation for individual leasing processes by Workflow Automation. New Lease, Exercising Lease Options, Lease Terminations - you name it - Petra can automate the process.
- Provide stakeholders with insight into the progress of a live leasing process as well as tools to explore potential hold ups and send reminders / chasers.
- Provide management and other stakeholders with clear oversight and visibility of workflow processes at an individual, business unit, or total portfolio level for analvsis - supported by a dashboard and additional reporting.
- Use key data from Petra to pro-actively manage your organisations leasing processes.
- Petra will help you to understand how long your leasing processes are taking and allow you to benchmark against stakeholder and organisation expectations.
